

## Merge Directories

A Dintillion.com product

First of all, thank you for using this Dintillion product! We hope you enjoy using it. This product has been designed with ease of use in mind, because operating a program should come naturally. If you do want some instructions, please read on. Otherwise, dive right in!

### Installation

This program is delivered with a setup program. All you need to do is select the setup file, and follow the instructions.

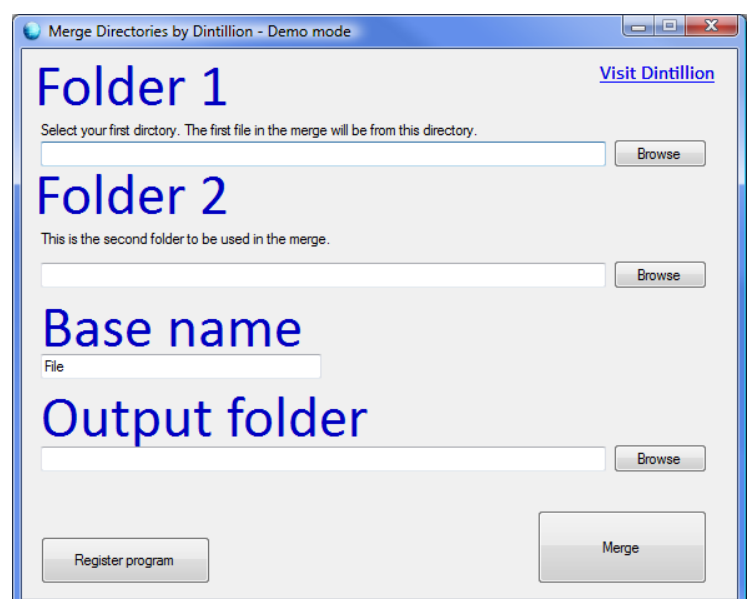

Prior to running the setup, please make sure you have .NET Framework 3.5 installed:

Go to Start > Control Panel > Programs and Features > Search for .NET Framework 3.5.

If you do not have it, it can be downloaded for free from Microsoft [here](#).

### Usage

- 1) Select folder 1. This is the first folder to be merged. This means that the first file in the merged folder will be taken from this folder.
- 2) Select folder 2. This is the second file in the merged folder.
- 3) Select the Base name. This is the word that is prefixed to every file in the merged folder. For instance, your base name is: "File ", then all your merged files will be named "File <sequence number>.<extension>".
- 4) Select the output folder. All the files will be merged into this folder. Make sure there are no files that are named the same, or the merge process will fail.
- 5) Click "Merge".

**TIP:** If you have not registered the program, only the first 10 files will be merged. If you like the program, please register. This will allow you to merge an unlimited number of files.

### Troubleshooting & tips

- If you are warned about 'file already exists', this means that in the output folder, a duplicate file was encountered. Change the folder you want to merge to, or delete the existing duplicate files in the output folder.

### Registration

If you decide you like this product, please consider registering it. This will have the benefit of allowing you to merge an unlimited number of files. You can purchase a registration code from [www.dintillion.com](http://www.dintillion.com).

If you find a certain feature lacking from the program, please contact us via [www.dintillion.com](http://www.dintillion.com). We would gladly work with you to add new features that would make this software better!

### Contact

If you have questions, suggestions or comments, please do not hesitate to contact us via [www.dintillion.com](http://www.dintillion.com)!
